INSTRUCTIONS: If you received a preprinted label, affix it in the space at left. If any of the information on the label is incorrect, draw a line through it and supply the correct information in the appropriate section below. If the label is complete and correct, leave Items I, II, and III below blank. If you did not receive a preprinted label, complete all items. "Installation" means a single site where hazardous waste is generated, treated, stored and/or disposed of, or a transporter's principal place of business. Please refer to the INSTRUCTIONS FOR FILING NOTIFICATION before completing this form. The information requested herein is required by law (Section 3010 of the Resource Conservation and Recovery Act).

EXCEL INDUSTRIES, INC. • BOX 727 • HESSTON, KANSAS 67062 • TELEPHONE (316) 327-4911

November 20, 1981

Mr. Wayne Kaiser
Environmental Protection Agency
Region VII
P.O. Box 15606
Kansas City, Mo. 64106

Dear Mr. Kaiser:

Please find enclosed an ammended "Notification of Hazardous Waste Activity" form, previously submitted on August 13, 1980. The changes are as follows:

- Line VI. Removed the X from Box C (Treat/Store/Dispose) to Box A (Generator) because Excel Industries does not have the facilities to treat, store or dispose of hazardous waste. Excel Industries is a generator only.
- Line VIII. Removed the X from Box A (First Notification) to Box B (Subsequent Notification) because this is the second notification submitted, the first being August 13, 1980.
- Line IXA. Removed number F017 (Paint Sludge) from Box #1 and instead entered number F003 (Xylene) in Box #1. This was done because our laboratory analysis (attachment #1) indicated that our paint sludge (F017) does not meet those standards as indicated by the E.P. Toxicity tests. This material is being dispose of at the Harvey County Landfill, Newton, Kansas due to approval from Richard Flanary, P.E. State of Kansas Hazardous Waste Management K.D.H.E. (attachment #2). Number F003 was entered instead because Xylene appears in 40CFR part 261.31 as a hazardous waste from non-specific sources. Excel Industries uses Xylol (Xylene) in its manufacturing process.
- Line IXC. Removed number U134 (Hydrofloric Acid) from Box #31. This was done because the laboratory analysis (attachment #3) indicated that our washer water which contains a diluted solution of Hydrofloric Acid (U134) does not meet those standards as indicated by the E.P. Toxicity tests (attachment #4). Mr. Dale Stucky from the Kansas Department of Health and Environment was notified of our findings on the washer water as not being a hazardous waste. It was his suggestion then that a Standard Well Water Analysis (attachment #5) be performed so that an Enviornmental Engineer from the K.D.H.E. Wichita, Kansas office could help us find a means

Mr. Wayne Kaiser
Environmental Protection Agency
Region VII

Page 2

of disposal of this waste water. Their conclusion was to have the City of Hesston work with Wilson Engineering of Salina, Kansas and have them determine what effects this waste water had on Hesston's Waste Treatment facility. A waste water sample was sent (attachment #6) to Mr. Bernie Hayen, City of Hesston, City Administrator who then contacted the Wilson Engineering Company. Wilson Engineering had Wilson Laboratory analyze this waste water (attachment #7) with a conclusion favorable for Excel Industries to dispose of this waste water in the sanitary sewer (attachment #8). Excel Industries has since October 29, 1981 disposed of this waste water in the sanitary sewer.

- Line IXC. Removed number U239 (Xylene) from Box #32 because it is previously listed as a Spent Non-Halogenated Solvent in line IXA.
- Line IXE1. Removed X from Box #1 (Ignitable) because there is no other non-listed hazardous waste which is ignitable.
- Line IXE4. Removed X from Box #4 (Toxic) because there is no other non-listed hazardous waste which is toxic.

Also please find enclosed copys of three manifests which represent removal of all hazardous wastes from our property. The shipments were as follows:

- 1) Manifest Document Number 06051981 which consisted of thirty five (35) 55 gallon drums of F003 Waste Xylene was picked up by Kansas Industrial Environmental Services, Inc. on October 6, 1981 (attachment #9).
- 2) Manifest Document Number 06091981 which consisted of twelve (12) 55 gallon drums of D001 Waste Compound Lacquer Paint or Varnish Removing Liquid was picked up by Kansas Industrial Environmental Services, Inc. on October 6, 1981 (attachment #10).
- 3) Manifest Document Number 10071981 which consisted of five (5) 55 gallon drums of F003 Waste Xylene was picked up by Kansas Industrial Environmental Services, Inc. on November 18, 1981 (attachment #11).

The above information should be sufficient to remove Excel Industries from the Treatment/Storage/Disposal classification to a Generator only with the Environmental Protection Agency. Please acknowledge the above request with a letter
